Size	EXTERNAL Size Range	INTERNAL Size Range
Ø	3-10mm/0.25-0.46"	8-15mm/0.37-0.56"
1	10-25mm/0.5-0.87"	12-25mm/0.62-1.02"
2	19-60mm/0.93-1.43"	19-60mm/1.06-2.37"
3	40-100mm/1.5-4.75"	40-100mm/2.44-3.0"
4	85-165mm/4.0-6.5"	85-165mm/3.06-4.25"

Pliers available in Chinese (shown) and German manufacture.  
Larger sizes are also stocked.

Applicators and Stackfeeders provide an economical method of handling and applying large quantities of radial circlips. There is an applicator available in straight or off-set for each circlip.

Stackfeeders are manufactured in two styles; the double rod type (shown) where two stacks of circlips complete with metal stacking rods are clipped to the base and the single, fixed rod type which circlips are transferred from their stacking rod.

All popular types and sizes of radial fitting circlips can be supplied pre-stacked ready for Stackfeeder use.

Starlock Push-On fasteners are used where a quick, permanent and efficient means of assembly is required. They simply push on to the shaft to give an instant fix and grip, thus eliminating costly threading and grooving operations. Once fixed in position they are so secure they cannot be removed without destruction. They are also available capped where appearance is a consideration.

This special applicator with magnetic tip provides an even faster assembly time.
